Pick and Place Miniature Circulators for L-Band Radar

1/7/2021 – San Jose, California: RFMW announces design and sales support for a high power SMT circulator from Skyworks Ireland. The SKYFR-001982 circulator delivers 200 Watt average and 400 Watt peak power handling for 1200 to 1400 MHz L-band radar systems and wireless applications. Low, 0.3 dB insertion loss improves efficiency with minimal transmit power loss. The SKYFR-001982 offers high power level handling with minimal thermal rise, providing a flow path for the RF signal as well as protection for sensitive components from excess signal reflection. A compact SMT housing is designed to be easily incorporated onto PCB boards with automated pick and place manufacturing.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
