SPDT for 5GHz WiFi Automotive Modules

10/13/2021 – San Jose, California: RFMW announces design and sales support for an AEC-Q100 Grade 2 Qualified switch from Skyworks. The SKYA21038 is a single-pole, double-throw (SPDT) switch intended for mode switching in WLAN applications ranging from 0.9 to 6 GHz. Using advanced switching technologies, the SKYA21038 maintains low insertion loss and high isolation for all switching paths. The high-linearity performance and low insertion loss achieved by the switch make it an ideal choice for low-power transmit/receive applications in infotainment and IoT M2M modules requiring enhanced robustness.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW website.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
