11/23/2021 – San Jose, California: RFMW announces design and sales support for a Southwest Antennas’ passive hemispherical antenna. The 1027-035 rugged, high-performance Iridium and GPS L1 antenna supports Iridium transmission and reception for worldwide voice and data communication along with receive only L1 GPS position and timing services. Key features include a quadrifilar helical antenna design, excellent axial ratio, compact size, and light weight for Iridium or GPS receivers, manpack radios, hand-held tactical radio systems, and other small form factor radios in unmanned systems, autonomous vehicles, and other automated or remote assets where antenna size needs to be minimized. IP67 rated, the 1027-035 features a recessed TNC(m) Non-Rotating RF connector.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.
