Ultra-Flex Omni Antenna

12/15/2021 – San Jose, California: RFMW announces design and sales support for a Southwest Antennas’ dipole antenna. The 1001-216 omni-directional antenna operates from 1000 to 1500 MHz with a peak gain of 2.15 dBi. Designed to minimize stress placed on the antenna and radio connection, this flexible antenna features an innovative, environmentally-sealed, spring base giving it the flexibility to deflect/bend with impacts and return to its original position. Fully sealed to prevent rain, dust, and other debris from degrading antenna performance, the 1001-216 is fully submersible once securely mated to a radio. A rugged G10 fiberglass radome holds up to abuse in the field with a low-glare, black finish helping the antenna blend into surroundings and not draw attention. Overall product height measures 8.79 inches.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
