LPWAN FEM Extends ISM Band Range

2/9/2021 – San Jose, California: RFMW announces design and sales support for a high performance RF front-end module (FEM). Skyworks’ SKY66422-11 is specifically designed for LPWAN – supporting LoRa®, SigFox and other unlicensed band technologies – as well as high-power ISM applications operating in the 860-930 MHz frequency range. Delivering improved sensitivity and more than double the operating range versus a standalone system-on-chip (SoC), the SKY66422-11 requires minimal board space and consumes low power, making it ideal for IoT and industrial platforms including sensors, beacons, smartwatches, thermostats, wireless cameras, medical pendants and smoke and CO detectors.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
