40 GHz Bench Top Amplifier

3/16/2022 – San Jose, California: RFMW announces design and sales support for a wideband EMC benchtop power amplifier from RF-Lambda. The REMC26G40GD delivers up to 45 dBm of continuous wave saturated output power over a range of 26.5 to 40 GHz with 50 dB of gain. Used in various applications ranging from aerospace/military, Test and Measurement, and wireless infrastructure, the benchtop amplifier is a convenient source of high-power RF energy. Supply voltage is either 110 or 220V AC. The REMC26G40GD EMC power amplifier offers features such as automatic calibration and gain control as well as over current, temperature, and reverse power protection.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
