Wi-Fi 6E Power Divider

3/9/2022 – San Jose, California: RFMW announces design and sales support for MECA Electronics broadband power divider/combiners. The 816-2-4.250-M01 RF power divider offers 16-way, in-phase performance from 0.5 to 8 GHz. Capable of handling up to 30 Watts of average power with an operating temperature of -55 to +85 degrees C, it offers phase and amplitude balance generally seen only in narrow band models. Typical VSWR’s range from 1.25:1 to 1.60:1 with 17dB minimum isolation. Made in the USA, 2-way, 4-way and 8-way power divider/combiners are also available and carry MECA’s industry leading 36 month manufacturing warranty. The broad band nature of these power divider/combiners eliminates the need to increase the component count in D.A.S systems when migrating to higher frequency platforms required to support 5G & Wi-Fi6 applications.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
