40 GHz Coaxial Attenuators for Test Stations

4/8/2021 – San Jose, California: RFMW announces design and sales support for the APITech fixed coaxial attenuators. The 40AH-03 is a 2.92 mm male to 2.92 mm female attenuator with 3 dB nominal attenuation from DC to 40 GHz. Handling up to 2 Watts of RF input power, the 40AH-03 provides a 5/16 inch hex nut on the attenuator body to accommodate proper torquing without rotational damage to the connector interface. Designed for high performance and repeatability with maximum VSWR of 1.40:1 and temperature range of -65 to +125 degrees C, the connector housing is passivated stainless steel with a gold plated beryllium copper center conductor. Applications include commercial, military COTS, production, and test and measurement.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
