Skyworks Wi-SUN FEM

6/22/2021 – San Jose, California: RFMW announces design and sales support for a Front-end Module (FEM) designed for Wi-SUN Wireless technology. The Skyworks SKY66122-11 FEM is specifically designed for Wi-SUN and other proprietary technologies operating in unlicensed 2.4 to 2.483 GHz bands enabling greater range extension with more than two times the range of standalone SoCs. With greater power delivery to antenna and low power consumption for optimal battery operation, the SKY66122-11 is uniquely supportive of IoT applications including end points and access points for smart grid and smart metering, smart city, industrial IoT sensors, surveillance and other applications.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
