**Mini Circulators Protect 5G Infrastructure**

6/20/2019 – San Jose, California: RFMW announces design and sales support for a 5G circulator from Skyworks Ireland. The SKYFR-001692 offers 21 dB of isolation for infrastructure designs from 3400 to 3600 MHz. The 10 mm package size occupies up to 50 percent less board space than competitive products without compromising functionality, making them ideal for 5G massive MIMO and small cell applications. Rated at maximum average power up to 20 W and peak power of 160 W, the SKYFR-001692 plays a critical role in protecting RF elements from excessive signal reflection, helping eliminate performance risks and safeguard vital equipment. Maximum insertion loss at room temperature is only 0.19 dB.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

**About RFMW**

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
