Giga-Trim® Trimming Capacitors

7/14/2021 – San Jose, California: RFMW announces availability of the Knowles (Johanson Manufacturing) portfolio of Giga-Trim trimmer capacitors. The portfolio provides a straight forward technique for fine tuning RF and microwave circuits by eliminating time consuming methods of abrasive trimming, cut and try adjustment techniques, and interchange of fixed capacitors. The Knowles 27273 has a capacitance range from 0.6 - 4.5 pF with up to 8 turns and a working voltage of 500 VDC. Giga Trim capacitors withstand the rigors of soldering heat, excessive turning and rough handling. Benefits include a fixed length, increased Q, essentially zero noise and reduced susceptibility to solder flux intrusion during installation.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.

To learn more about RFMW, visit their Website at www.rfmw.com, or call us at 1.877.FOR.RFMW (367-7369), or via e-mail at info@rfmw.com.
