Concealment Antenna for DoD Band Applications

8/18/2021 – San Jose, California: RFMW announces design and sales support for a Southwest Antennas’ omnidirectional antenna. The 1066-094 is a concealment antenna designed for use in systems where covert antennas are necessary for mission security. Operating in the 1.35 to 1.4 GHz band, the 1066-094 offers small form factor, very light weight, and high gain performance of up to 2 dBi. Offered without a radome, the antenna is not suited for outdoor use unless integrated into another product, such as unmanned vehicles or concealments for covert surveillance applications. It comes with an integrated, 54 inch, low-loss RF cable terminated with a rotating SMA male connector.

Samples are available for qualified requirements through RFMW at 1-877-FOR RFMW (367-7369) within North America; or please find your local sales engineer (worldwide) at the contact page on the RFMW web site.

About RFMW

RFMW is a specialty electronics distribution company focused exclusively on serving customers that require RF and microwave components and semiconductors, as well as component engineering support. The company continues to expand its list of products from selective suppliers with RF/microwave expertise. RFMW deploys a highly experienced, technically skilled team to assist customers with component selection and fulfillment.
