

Overview

The 4G LTE Cellular Omni Concealment Antenna was designed by Southwest Antennas for use in covert surveillance operations, antenna concealment devices, or any application where discreet antenna placement is needed. Measuring only 4.70" x 1.70" and weighing less than one ounce, the 4G LTE Cellular Omni Concealment Antenna is easy to integrate into small devices or spaces without clearance for larger antennas and is specially tuned for concealment material substrates

The penta-band design gives the 4G LTE Cellular Omni Concealment Antenna coverage across all 4G LTE bands, allowing for both domestic and international use. A miniature low loss RF cable and SMA Male connector allow for flexible connection options.

Part # 1066-014 features a 1 foot miniature low-loss RF cable with an SMA(m) RF connector.
