PRODUCT LIFE CYCLE DISCONTINUATION NOTICE

Spectrum Control Inc. (SCI) is committed to providing our valued customers with cost-effective products that meet high quality standards. To ensure that commitment, SCI periodically evaluates the features and cost effectiveness of current product lines to ensure we meet these goals. In consideration of these reviews, Spectrum Control has determined that the following product(s) would be discontinued:

Part Numbers	Current Status
37-XX-XX Series Fixed attenuators, 8.5 GHz, 10 watts, N (F), N (M). (XX represents dB value and connector type, including PN 37-10-34.)	Discontinued series due to part rationalization efforts: low volume/poor sales Possible alternative is the 18N10W-XX Series Fixed attenuators, 18 GHz, 10 watts, N (F), M (F). PN 18N10W-10 has a lower peak-power rating than the 37-10-34 (500W vs 1kW), but the average power rating is the same at 10W.

Possible alternative is the 18N10W model:
